How It WorksFor BrandsFor CustomersResourcesPartner with Shona

WELCOME TO SHONA

Streamline your
after-sales process.
Recover value.
Keep customers.

Shona helps fashion brands recover damaged inventory and give customers a trusted way to repair or alter garments they've purchased.

Explore Brand Portal →

Access Aftercare →

REPAIR /
AFTERCARE

RECOVER

Recover value from damaged in
ventory.

RETAIN

Keep customers connected thro
ugh aftercare.

LEARN

Turn after-sales activity int
o intelligence.

PRIMARY CTA

Explore Brand Portal demonstrates the
B2B system. Access Aftercare
demonstrates the customer experience.

SHONA

How It Works

For Brands

For Customers

Resources

Partner with Shona

One after-sales system. Two experiences.

The customer sees simplicity. The brand sees the whole operating picture.

01

CUSTOMER BUYS

Garment enters brand ecosystem

02

CUSTOMER NEEDS HELP

Repair, alteration or damage

03

SHONA COORDINATES

Intake, specialist, logistics

04

VALUE RECOVERED

Repair, alter or recover

05

BRAND LEARNS

Patterns become product insights

KEY MESSAGE

Shona is not just a repair marketplace. It is after-sales infrastructure for the brand.

SHONA

Overview

Skirt	Repair	Seam	Completed	22 Aug

Open case →

OPERATIONAL VALUE

The brand can see the status of every customer request without manually chasing tailors or customers.

● ● ● shona

SHONA

What can we help with?

Keep your favourite pieces in circulation.

■ Repair**>✂ Alteration**

Powered by SHONA

Not sure what you need?

■ Chat with a specialist**CUSTOMER PRINCIPLE**

No corporate dashboard. The customer sees a simple aftercare service connected to the brand they bought from.

• • • shona

1 / 4

Which garment needs attention?

Tell us what you bought so we can keep the request attached to the right product and order.

DATA CAPTURE

Structured intake happens before WhatsApp so Shona retains useful operational data even when the human conversation happens elsewhere.

Describe what needs fixing...

NOT SURE?

Talk to a Shona specialist.

Send photos and get a human assessment.

Customer: Can this be repaired?

Specialist: Yes.
Send a photo.

WhatsApp

Lead seamstress

MVP APPROACH

Do not build chat. Use WhatsApp Business for the human layer while Shona owns the structured workflow.

• • • shona

3 / 4

Choose your pickup time

Your specialist has confirmed the service.

AUGUST 2026

M	T	W	T	F	S	S
17	18	19	20	21	22	23
24	25	26	27	28	29	30
31	1	2	3	4	5	6

11:00–13:00

14:00–16:00

16:00–18:00

Confirm pickup →

IMPORTANT

Scheduling comes after assessment and before tracking. The same flow later schedules return/delivery.

● ● ● shona

4 / 4

How would you like it returned?

■ Delivery

Choose address + time

■ Collection

Choose collection point + time

Estimated completion

2–3 days after pickup**Confirm schedule →**

LOGISTICS LAYER

The brand gets a managed pickup/return workflow. The customer gets one clear appointment rather than a long WhatsApp negotiation.

shona

YOUR REPAIR

Trousers

Waist alteration

- Request received
- Specialist assigned
- Pickup scheduled • 24 Aug • 11:00–13:00
- In repair

Chat with specialist

View delivery details

- Ready for delivery

Expected delivery: 27 Aug

CONTINUITY

WhatsApp remains accessible, but Shona remains the source of truth for status and scheduling.

WRITE OFF

WHY IT MATTERS

This is a B2B value layer, not a customer screen. It helps the brand see what damaged inventory can be put back into circulation.

PRODUCT INSIGHT

Trouser SKU 204 has generated 18 waist alterations.

Potential action: review fit / sizing / construction.

WHAT SHONA SELLS

Not 'data'. Shona sells actionable intelligence from real after-sales behaviour.

CONVERSION RULE

The website earns the meeting. The pilot proves the KES 150k–200k/month value proposition.

THE PILOT

- ✓ Customer aftercare
- ✓ Inventory recovery
- ✓ Operational intelligence

**Start small.
Measure value.**

Customer data feeds the brand view; the brand view feeds decisions; the repair network delivers the physical service.

BUILD PRINCIPLE

Prototype first. Manual operations behind the scenes. Automate what proves valuable.
